

GS1 US Data Hub Q3 2024 RELEASE NOTES

GS1 US Data Hub allows you to identify, create, manage, share, and verify product and location data through one convenient platform. The Data Hub Q3 2024 release delivers important enhancements and improvements to the user experience for members of all subscription types.

Enhancements

GS1 US Data Hub

- Updated Homepage experience
 - Modernized design with new prefix capacity layout and dynamic video content
 - Additional dynamic educational resources and shortcuts to key Product and Location functions
 - Added Prefix verification view and shortcut for MDPC to notify users that have not yet verified if their prefixes will be used for medical devices
- Updated Data Hub Administrator experience
 - Modernized interface with a focus on ease of use and more logical layout

GS1 US Data Hub | Product

- Simplified share settings allow brands to more easily identify who should be able to search for and see their products
 - Added Share toggle to product detail pages to enable quick sharing changes for products
 - Added ability to share/un-share multiple products at once in the user interface
 - Removed the ability to share to specific trading partners

GS1 US Data Hub | Company

- Retired Company API V2 and V3

GS1 US Data Hub | Location

- Simplified share settings allow location owners to more easily identify who should be able to search for and see location identifiers
 - Additionally allows location owners to identify specific Trading Partners that may view their location identifiers
- Phone and Email are now visible attributes in View/Use so that users can more easily ask questions about GLNs they interact with
- Updated the Replaces GLN attribute to accept multiple values and allow users to point to GLNs outside of their hierarchy
