

The Global Language of Business

GS1 Standards for DSCSA Suppliers Certificate Course

Avoid disruption in your supply chain by learning how to properly implement GS1 Standards critical to interoperability.

From uniquely identifying your packages and cases all the way to tracking and tracing pharmaceuticals, GS1 Standards can help you prepare for the Drug Supply Chain Security Act (DSCSA) requirements and, ultimately, seamless interoperability. Adopted and supported by industry leaders, GS1 Standards help make it possible to follow prescription drugs from the manufacturer to the dispenser, thereby helping to improve safety, efficiency, and patient care.*

At the end of this course, you'll have the foundational knowledge of GS1 Standards that, when applied correctly to support the DSCSA, can help lead to full interoperability including:

- Create Global Trade Item Numbers® (GTINs®), Global Location Numbers (GLNs), and Serial Shipping Container Codes (SSCCs) to uniquely identify products, locations, and logistic units
- Use Application Identifiers (AIs) to help ensure your products are accepted by trading partners
- Capture event information as your product moves through the supply chain with Electronic Product Code Information Services (EPCIS)

Who Would Benefit

- Pharmaceutical manufacturers
- Wholesale distributors
- Repackagers
- Solution providers
- Third-party logistics providers

*For information about the act, see the [2013 Drug Supply Chain Security Act](#).

Earn a Badge

Did you know when you successfully complete a GS1 US® certificate course, you can earn an important credential in the use of GS1 Standards? And you can add this new skill to your online profile with a GS1 US Badge and share it via social media.

Course Modules

Modules 1 through 7 are also included in the GS1 Foundations for Healthcare Certificate Course. The modules listed below are part of the online course; similar topics are covered in the instructor-led, interactive classroom course.

Module 1: Overview of GS1 Standards

Module 2a: How to Use Your GS1 Company Prefix (NDC)

Module 2b: How to Use Your GS1 Company Prefix (EAN/U.P.C.)

Module 3: How to Create and Manage Your Global Trade Item Numbers (GTINs)

Module 4: GTIN Management Standard

Module 5: How to Barcode Your Products

Module 6: Introduction to the Global Location Number (GLN)

Module 7: Introduction to Supply Chain Visibility with EPCIS

Module 8: GS1 Standards for DSCSA

- Lesson 1: GS1 Healthcare US® Overview
- Lesson 2: DSCSA Regulations and Timeline
- Lesson 3: Using the GS1 System of Standards to Identify
- Lesson 4: Capturing Information for DSCSA Purposes
- Lesson 5: Sharing EPCIS Information Along the Pharmaceutical Supply Chain

Assessment

An assessment will be administered throughout this course to gauge your understanding of the material. There is no additional charge for the assessment, which is for review purposes only. Those who attend and complete the course will receive a Certificate of Completion and GS1 US Badge (note: badge is issued within three weeks of course completion).

Online Course

By taking our online version, you'll have the opportunity to:

- Learn at your own pace and access course content anytime, anywhere you have an internet connection.
- Gain unlimited access to course content for one year. Play, replay, and fast-forward to specific content as many times as you need.
- Complete knowledge checks designed to practice course material and to confirm knowledge transfer.

Disclaimer: GS1 US is the local GS1 Member Organization that supports implementation of the GS1 System of Standards in the United States. GS1 US employees are not representatives or agents of the U.S. FDA, and the content herein has not been reviewed, approved, or authorized by the U.S. FDA. The letters "U.P.C." are used solely as an abbreviation for the "Universal Product Code" which is a product identification system. They do not refer to the UPC, which is a federally registered certification mark of the International Association of Plumbing and Mechanical Officials (IAPMO) to certify compliance with a Uniform Plumbing Code as authorized by IAPMO.

About GS1 US

GS1 US®, a member of GS1 global, is a not-for-profit information standards organization that facilitates industry collaboration to help improve supply chain visibility and efficiency through the use of GS1 Standards, the most widely used supply chain standards system in the world. Nearly 300,000 businesses in 25 industries rely on GS1 US for trading partner collaboration that optimizes their supply chains, drives cost performance and revenue growth, while also enabling regulatory compliance. They achieve these benefits through solutions based on GS1 global unique numbering and identification systems, barcodes, Electronic Product Code (EPC®)-based RFID, data synchronization, and electronic information exchange. GS1 US also manages the United Nations Standard Products and Services Code® (UNSPSC®). For more information, visit www.gs1us.org.
