

## Attribute Recommendations Related to Buy American Provisions for USDA School Meals Programs

To support Buy American requirements for the U.S. Department of Agriculture (USDA) School Meal Programs, it is recommended that specific data fields be used to share information with trading partners. For users of the Global Data Synchronization Network™ (GDSN®), a code value has been created to notify recipients of the status of the trade item.

**Attribute:** Regulation Type Code List

**Code Value:** BUY\_AMERICAN\_PROVISION\_USDA

**Name:** Buy American Provision USDA

**Definition:** USDA administers a Buy American provision requiring school food authorities to purchase, to the maximum extent practicable, domestic commodities or products. Program regulations establish if a commodity or product is considered domestic for these purposes, as well as exceptions under certain circumstances.

*\*Please note: There is also a separate BUY\_AMERICAN\_ACT code value available in GDSN, which does not apply for this purpose. The Buy American Act code value should only be used when sharing information with your recipient related to broader Buy American Act requirements, when relevant. BUY\_AMERICAN\_PROVISION\_USDA should be used to share information related to USDA Buy American requirements for School Meal Programs.*

This newly created code value can be located in the **(BMS # 3070) Regulation Type Code List**. In addition, the following attributes are recommended when using the Buy American Provision USDA code value:

### 1. Trade Item is Eligible for USDA School Meal Programs

ATTRIBUTE	SELECTIONS
RegulationTypeCode	<b>BUY_AMERICAN_PROVISION_USDA</b>
IsTradeItemRegulationCompliant	<b>TRUE</b> NOT_APPLICABLE UNSPECIFIED
